

The Journey of Sakline Mustak

Introduction

I am Sakline Mustak, a passionate individual from Barishal, Bangladesh. My journey has been filled with ups and downs, shaped by a desire to be creative, to connect with people, and to understand the world. This document shares my story, my dreams, and my struggles.

Educational and Technical Background

I completed my Bachelor's in Computer Science and Engineering from the University of Barishal with a CGPA of 3.13, and I'm currently pursuing my Master's in the same field. Alongside my academic journey, I developed a deep interest in Data Science, particularly in applying machine learning techniques to solve real-world problems.

Through projects like housing price prediction, donor prediction, and time series forecasting, I built my confidence and technical skills. But beyond these technical achievements, there's another side of me-emotional, artistic, and curious.

Who I Am

I am someone who loves video editing and storytelling through visuals. I've worked with tools like Adobe Premiere Pro and After Effects, creating meaningful content in my free time. I've done several local freelance video projects, which allowed me to express my creativity.

But I must confess: I'm nervous, easily confused, and often overthink things. Decision-making is

The Journey of Sakline Mustak

hard for me. I take too much time, and I end up gossiping with friends to ease my stress. I'm not great at connecting with strangers, and my emotional nature makes me vulnerable, but it also makes me deeply human.

Struggles and Growth

For many years, I battled sadness and inconsistency. Even when I tried to stay motivated, something always pulled me down. I lacked discipline and routine. But deep down, I never stopped dreaming. I want to make something valuable for the world-something that touches people.

Sometimes, I feel stuck in a loop of overthinking and self-doubt. But when I edit a video or build something new with data, I feel alive again.

Dreams and Inspirations

My dream is to travel abroad. I want to explore different cultures, meet people, learn languages, skydive, and experience adventure. These dreams are not just fantasies; they are my fuel. They keep me going. I want to work hard, build projects that matter, and maybe one day, use AI to help others understand themselves better.

One idea I've been working on is a RAG-based chatbot. It would remember your past conversations, learn from them, and offer personalized advice. For example, if you're feeling low and tell the bot, "I'm sad," it could recall that you've often felt this way and gently suggest, "Why don't you edit a video? It used to make you feel better."

The Journey of Sakline Mustak

Conclusion

This is me-Sakline Mustak. A data enthusiast, a video editor, a dreamer, and an emotional soul trying to find meaning in a world full of noise. My journey is still unfolding, but I believe that by embracing both my strengths and weaknesses, I'll find my own way to make a difference.
